

Curaphen® Extra Strength

Professional Pain Formula*†

For Extra Powerful Relief, **Curaphen® Extra Strength** is the Answer!*†

Curaphen® Extra Strength provides higher levels of effective ingredients in a larger, more concentrated dosage form than regular strength Curaphen®. Each ingredient addresses pain via a different clinical pathway, which results in significant pain relief.*†

Recommendations: One tablet daily. May take one tablet three times daily, or as directed by your healthcare practitioner. If pregnant or nursing, consult a healthcare practitioner before use.

† Occasional muscle pain due to exercise or overuse. All ingredients established in human studies for safety and effectiveness. Does not interfere with stomach, liver or kidney function.

Clinically Studied BCM-95® Curcumin and BosPure® Boswellia

For Extra Powerful Relief, Curaphen® Extra Strength is the Answer!*†

When you need even stronger relief from occasional pain, Curaphen® Extra Strength is the safe, effective choice.*†

Curaphen® Extra Strength provides higher levels of effective ingredients in a larger, more concentrated dosage form than regular strength Curaphen®. Each ingredient addresses pain via a different clinical pathway, which results in significant pain relief.*†

It provides the same strong ingredients found in Curaphen®, including the amazing curcumin extract BCM-95®, but in a tablet that provides even more superior ingredients for award-winning pain relief in each convenient dose.*† It's everything you've come to love about Curaphen® – with even more!

Strong Ingredients!

- **BCM-95® Curcumin** has been clinically tested and shown in published studies to have **up to 10 times the absorption and greater blood retention time** at significant levels than standard 95% curcumin extracts.
- **BosPure® Boswellia** provides an extract with reduced beta-boswellic acid content to less than 5%, but assures at least 10% or more acetyl-11-keto-beta-boswellic acid (AKBA) content – for improved benefits.*

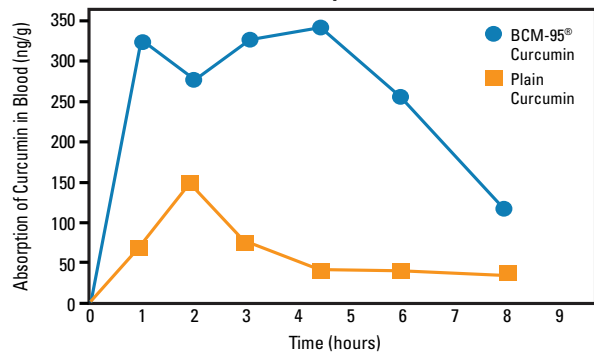

- **DLPA** (DL-phenylalanine) has been shown to support healthy endorphin and enkephalin activity, the body's own powerful pain relievers.†
- **Nattokinase** helps promote blood flow, aiding the other ingredients in Curaphen to reach all areas of the body.*

Need an Extra-Powerful Answer?

Get Curaphen® Extra Strength – With BCM-95® Curcumin!*

BCM-95® has been proven in published clinical studies to provide consistent absorption and powerful benefits.

Published Human Cross-Over Study to Evaluate Absorption of BCM-95®

Amazing Absorption!

You won't find another curcumin like the BCM-95® featured in Curaphen® Extra Strength!

Frequently Asked Questions for Curaphen® Extra Strength:

Q. Is it okay to take Curaphen® Extra Strength and Curaphen® at the same time?

A. You can take both of them at the same time, but you may want to start with Curaphen Extra Strength for initial intensive benefits, and then use Curaphen as a daily maintenance supplement.

Q. What is the difference between Curaphen Extra Strength and the regular formula Curaphen?

A. Curaphen Extra Strength simply provides a higher level of ingredients in a different ratio and a more convenient dosage form. Just one or two tablets per day of Curaphen Extra Strength may be enough to provide the benefits people desire.

Q. What makes the BosPure® Boswellia in Curaphen Extra Strength different than other boswellia extracts?

A. While most boswellic acids are associated with positive benefits, not all of them truly are best when you're trying to support an active lifestyle. By ensuring at least 10% or more acetyl-11-keto-β-boswellic acid (AKBA), and reducing beta-boswellic acid to less than 5%, BosPure® provides much greater benefit than most standard boswellic extracts, some of which have up to 15-25% beta-boswellic acid!

Q: Does Nattokinase contain Vitamin K?

A: No. Nattokinase is an isolated and purified enzyme extract from natto (a fermented soybean food), which does not contain vitamin K.

Q: Is there a difference between Curaphen Extra Strength and curcumin?

A: Yes. Curcumin is the beneficial compound found in the turmeric plant. Curaphen Extra Strength is the name of the product which contains our highly absorbable BCM-95® Curcumin along with BosPure® Boswellia, DLPA and nattokinase.

Q: Is there a difference between turmeric and curcumin?

A: Yes. Turmeric is the plant that provides curcumin. Turmeric typically contains about 2-5% curcumin, so taking an unstandardized, powdered turmeric product means that very large amounts would be required to get a beneficial amount of curcumin. Additionally, curcumin is poorly absorbed from the gastrointestinal tract. While turmeric is excellent when used as a spice, a high absorption curcumin extract, such as the BCM-95® used in Curaphen Extra Strength, is a better choice for health benefits.

Q: How does the BCM-95® Curcumin in Curaphen Extra Strength compare to other curcumin and turmeric products?

A. The proper product comparison is curcumin to curcumin. However, since many companies are comparing their curcumin absorption to turmeric, we provide this information as a service to our practitioner partners and their patients.

- Plain curcumin 95% compared to turmeric delivers up to 50 times the curcumin as the same amount of turmeric.
- BCM-95® Curcumin has been proven to deliver up to 10 times more curcumin into the bloodstream as the same amount of plain curcumin.
- Therefore, when compared gram per gram, BCM-95® Curcumin up to 10 times more curcumin than plain curcumin 95% and up to 500 times more curcumin than that found in an equal amount of turmeric.

Q: Why is silicon dioxide in this product?

A: Silicon dioxide is just there to make sure that the premium ingredients in Curaphen® Extra Strength are properly mixed and measured so that every capsule guarantees the same effective, beneficial components. Many botanical ingredients are, by their nature, "sticky" and can tend to clump if they are not mixed with a minute amount of inert, harmless material. We never use extra ingredients in any EuroMedica® product unless required for quality reasons.

What to pair with Curaphen® Extra Strength:

- **ArthroMed®** – Supports joint health, plus flexibility and comfort with clinically studied BCM-95® Curcumin, BosPure® Boswellia, and powerful herbal ingredients.*
