

Premium European Hemp Oil

Supports the Endocannabinoid System*

Hemp Oil from EuroMedica is produced via a clean, chemical-free, supercritical CO₂ extraction process. The concentrated hemp oil comes from plants that have been specifically cultivated and carefully selected to contain a full spectrum of phytonutrients to support the body's endocannabinoid system.*

Additionally, the European hemp used in this product is non-GMO and farmed according to eco-friendly practices. It is one of the most highly-regarded botanical ingredients available.

- **Full entourage of concentrated, beneficial compounds that nourish the endocannabinoid system***
- **Convenient, consistent dosage—superior to liquid**
- **Supercritical CO₂ extraction process**
- **Specially cultivated, non-GMO European hemp—a trusted source**
- **Farmed according to stringent, Ecocert earth-friendly practices**

Active support of the endocannabinoid system can render a multitude of benefits.* Hemp is shown to support this vital system, and the full spectrum of phytonutrients are an important factor. EuroMedica **Hemp Oil** delivers, with a complete entourage of concentrated compounds. After all, the benefits of hemp depend on more than just one specific, isolated phytonutrient. You will notice—and appreciate—the difference.

In addition to EuroMedica Hemp Oil, also look for EuroMedica brand **Hemp Oil + Curcumin**.

Frequently Asked Questions for Hemp Oil:

Q. How much CBD is in EuroMedica® brand Hemp Oil?

A. We do not make claims regarding cannabidiol (CBD). The FDA has called out companies for making claims for CBD on their websites, labels, and literature. However, hemp and hemp oil remain legal. Hemp is one of the fastest growing categories in the health food market. We want to assure that consumers who need this excellent herbal product continue to have access to high quality, full spectrum hemp oil. Therefore, we do not make claims regarding CBD.

Q. What is the difference between hemp oil and marijuana?

A. Hemp oil (from agricultural hemp) and marijuana are not the same. While both are obtained from *Cannabis sativa* they feature different ratios of key phytocompounds. The primary phytocompound in marijuana is THC (tetrahydrocannabinol), which is what people normally associate with the mind-altering effects of the plant. Agricultural hemp contains almost no THC, but contains many other compounds, that are beneficial – and legal – in hemp oil.

By law, hemp oil must not contain more than 0.3% THC. Our products are thoroughly tested and documented to meet this requirement.

Q. How much THC is in EuroMedica brand Hemp Oil?

A. Less than 0.3% THC. This hemp oil meets all requirements by the FDA.

Q. What is the omega-3 fatty acid content of Hemp Oil?

A. While plant omega-3 fatty acids occur naturally in hemp oil, we do not standardize for this compound. The amount may vary from batch to batch.

What to pair with Hemp Oil:

- **Curaphen®** – Provides clinically studied, high-absorption curcumin, and uniquely standardized boswellia blended with DLPA and nattokinase for pain relief.*†
- **EurOmega-3®** – Whole food Omega-3 fatty acids in a biologically active, stable, phospholipid form as it occurs in salmon.

† Occasional muscle pain due to exercise or overuse
