Manufactured by a cGMP compliant facility exclusively for:
EuroMedica 955 Challenger Drive Green Bay, WI 54311
 866-842-7256 euromedicausa.com

- Strong Immune Support
- Sinus, Lung, & Respiratory Function
- Healthy Histamine Levels**†

Synergy that Delivers for Immune Support*

When you are looking for effective and powerful immune support, Quercetin Plus Vitamin C provides two of the most highly regarded nutrients that consistently deliver.*

Quercetin Working at its Fullest Potential

While quercetin is well-known for its potential to support a healthy immune response, respiratory function, and healthy histamine levels†, the fat-soluble flavonoid can also be difficult for the body to absorb.*

That's why we've combined quercetin with GammaSorb™, a unique delivery system which allows this fat-soluble ingredient to absorb more easily, similar to a water-soluble nutrient. To put it simply, GammaSorb allows quercetin to reach its full potential.

Vitamin C is An Essential Immune Nutrient*

Vitamin C is a key nutrient for healthy immune function. While this critical vitamin is available from foods, getting a consistent amount—as found in this formula—is best for reliable support every day. Vitamin C can also aid in quercetin absorption, making it even more effective.* The result is a synergistic combination that helps you support a healthy, strong immune response every day.*

Frequently Asked Questions for Quercetin Plus Vitamin C:

Q: How does GammaSorb™ work?

A. GammaSorb (gamma-cyclodextrin) could be compared to a microscopic bucket, scoop, or other container that carries fat-soluble ingredients through the walls of the intestines as though those ingredients were water soluble. It's almost like having a water-soluble shell that surrounds a fat-soluble nutrient to protect it just long enough for it to be absorbed.

Q: What is the source of quercetin in this formula?

A. Quercetin is widely available from many foods, including onions, apples, tea, berries, and grapes. However, there are many other rich botanical sources, such as the flower buds from the Japanese Pagoda Tree (*Sophora japonica*), which provide the quercetin used in this formula.

What to Pair with Quercetin Plus Vitamin C:

- **Elderberry Immune Complex*** – provides clinically studied elderberry (*Sambucus*) along with key vitamins and minerals for outstanding immune support.*
- **Vitamin D3 5,000 IU** – Mixed berry chewable to support a strong immune system.*
