

ProHydra-7™

Improves Skin Hydration and Relieves Skin Dryness*

ProHydra-7™ contains a blend of sea buckthorn pulp and seed oil for optimal support:

- Delivers 150 mg of omega-7 per capsule
- Hydrates mucous membranes in vaginal and urinary tracts*
- Soothes the gastrointestinal tract*
- Enhances the health and elasticity of skin*
- Helps replenish and retain proper eye moisture*

Recommendations: 1 softgel daily. May take up to four times daily for advanced support, or as recommended by your healthcare practitioner.

If pregnant or nursing, consult a healthcare practitioner before use.

ProHydra-7™

Improves Skin Hydration and Relieves Dryness*

Features SB-150™ Sea Buckthorn Oil

60 Softgels

NON-GMO DIETARY SUPPLEMENT

SUPPLEMENT FACTS

Serving Size: 1 Softgel
Servings Per Container: 60

Amount Per 1 Softgel:	%DV
Calories	5
Total Fat	0.5 g < 1% ¹
Proprietary Blend	500 mg **
Containing Sea Buckthorn (<i>Hippophae rhamnoides</i>) Berry Pulp and Seed Oil (SB-150™) via CO ₂ extraction providing 150 mg of omega-7	

**Daily Value (DV) not established.
1Percent Daily Values (DV) are based on a 2,000 calorie diet.

Other Ingredients: gelatin, glycerin, purified water, rosemary leaf extract.

Manufactured by a cGMP compliant facility exclusively for: EuroMedica 955 Challenger Drive Green Bay, WI 54311 866-842-7256 euromedicausa.com

No sugar, salt, yeast, wheat, gluten, corn, soy, dairy products, artificial coloring, artificial flavoring, or artificial preservatives.

Delivers 150 mg of omega-7 per softgel

Hydrates mucous membranes in vaginal and urinary tracts

Soothes the gastrointestinal tract

Enhances the health and elasticity of skin

Helps replenish and retain proper eye moisture*

ProHydra-7 features **SB-150™**, a proprietary sea buckthorn blend that provides over 200 nutrients. **ProHydra-7** helps the body retain hydration where it is needed most.*

Not all sea buckthorn products provide highly beneficial omega-7 healthy fats. Only the berry contains this rare, important fatty acid—not the seed. **ProHydra-7** (SB-150) delivers sea buckthorn berry for omega-7 fatty acids that are difficult to get from diet alone. These incredibly valuable nutrients are known for their whole-body benefits. That's because omega-7 fatty acids are incorporated into the walls of the cells, helping cells better hold on to moisture—a mark of health and vigor that your patients will appreciate.*

Scientific evidence shows **ProHydra-7** supports:

- Mouth
- Skin
- Digestive tract
- Vaginal tissue*
- Heart health*

The ProHydra-7 Difference

ProHydra-7 provides a better sea buckthorn berry, sustainably sourced, harvested, and extracted with your health and the future in mind. It is truly a unique sea buckthorn supplement:

- Standardized for omega essential fatty acid content, including omega-7
- 150 mg of omega-7 per softgel
- Provides SB-150 sea buckthorn berry
- CO₂ extraction, no hexane or other harsh chemicals
- Hand-harvested to protect the berry from damage and oxidation and the plant for future crops

Frequently Asked Questions for ProHydra-7™

Q. What is a supercritical extraction?

A. When the most active and beneficial compounds of a plant have been identified and isolated for use in a dietary supplement or food, that product is called an “extract.” There are a number of different ways to remove these desirable compounds from the plant. Water and alcohol are two of the most well-known and commonly used materials (technically known as “solvents”). In fact, a tea bag in hot water is an example of a water extraction that almost everyone has at some time prepared for themselves. Supercritical CO₂, meaning carbon dioxide in a liquid form, is a special type of non-toxic solvent that is particularly good for extracting essential oils without damaging them or causing them to become rancid through oxidation. Supercritical CO₂ extraction is the preferred method for obtaining a full spectrum essential oil extract, discarding the non-essential fibrous plant material. Supercritical CO₂ yields a very high quality extract, with no heavy metals or potential for bacterial growth. Because it evaporates completely there is also no concern about contamination or residue left in the extracted materials.

Q. What makes this particular sea buckthorn extract such a premium ingredient?

A. Sea buckthorn berries are difficult to harvest. They must be removed from shrub-like trees covered in thorns. As a shortcut, some companies actually cut down the shrubs, freeze the branches, and shake them to make the frozen berries fall off. This is a poor choice for two reasons. Freezing and then shaking off the berries damages them and yields a poor quality, low nutrient extract. Cutting down the shrub as a harvesting method is not a sustainable practice. All of the sea buckthorn berries in **ProHydra-7** are hand-harvested. This is labor intensive, and thus more expensive, but well worth it. It ensures that the plants survive to produce a crop year after year and allows us to offer a highly potent and effective product.

Q. What is the difference between sea buckthorn and fish as a source of omega-7?

A. Sourcing omega-7 from fish oil presents many of the same processing challenges that accompany extracting fish oil omega-3. To begin with, fish is not a rich source of omega-7, and therefore requires high heat and solvents (including bleach). This results in a triglyceride ethyl ester oil, the least stable form. Also, there is typically much less omega-7 per capsule than is found in sea buckthorn omega-7, so compliance with an omega-7 regimen could be much more challenging.

Another point of difference is that the range of nutrients found in hand-harvested sea buckthorn berries simply aren't present in fish, making it a superior source for reliable benefits. Omega-7 sourced from sea buckthorn, specifically the SB-150™ sea buckthorn in **ProHydra-7**, provides a wide spectrum of nutrients in addition to omega-7. That's because it uses a supercritical CO₂ process that preserves the full complex of nutrients (including vitamin E tocopherols and tocotrienols), and plant sterols. Sea buckthorn, properly harvested and gently processed, simply allows for a more complete ingredient source than fish-sourced omega-7.

What to Pair with ProHydra-7™

BosPro™	Provides clinically studied boswellia with high AKBA levels for healthy inflammation response.*†
EurOmega-3®	Provides bioidentical omega-3 exclusively from salmon with DHA/EPA in a biologically active, phospholipid form, ensuring absorption and improved stability.

†Occasional inflammation due to exercise or overuse.
