# Enhanced Absorption for Overall Health<sup>\*‡</sup>

Only nutrients that can be absorbed well by the body can work to their full potential. That's why EuroMedica® pairs specific, hard-to-absorb nutrients with GammaSorb, a plant-based material that makes them more easily absorbed for optimal health benefits!\*

## Gamma Cyclodextrin: The Cyclodextrin With the Greatest Potential

Of all the cyclodextrins, gamma cyclodextrin has the largest carrying capacity. It also appears to be the most readily dissolvable by salivary and pancreatic amylase, a starch-digesting enzyme. This may give it even stronger bioavailability potential compared to alpha and beta cyclodextrin molecules.

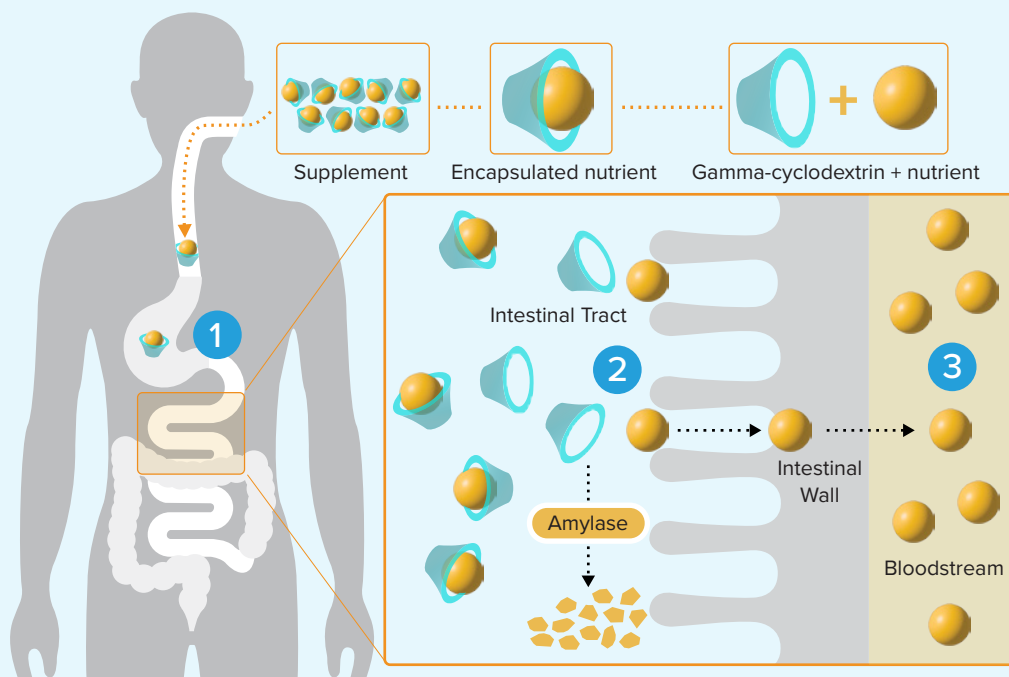

And aside from absorption enhancement, gamma cyclodextrin may have health-promoting properties all on its own.\*\*

And, cyclodextrins allow supplements to be formulated as chewables, which many people prefer over swallowing tablets or capsules. Cyclodextrins are especially useful for covering up bitter tastes, as in the case of red ginseng, without the need for synthetic sweeteners. They also aid in the stability and shelf life of supplements as well.

However, the primary point to remember about gamma cyclodextrin is that it can hold fat-soluble and hard-to-absorb nutrients, allow them safe passage through the intestinal walls, and greatly enhance the absorption—and ultimately the benefits—of certain types of nutrients.‡

Ultimately, this safe and efficient innovation has a growing track record showing that it can make powerful nutrients even better.

## HOW CYCLODEXTRINS WORK IN THE BODY

1 In a dietary supplement, the nutrient/cyclodextrin combination travels through the stomach and into the intestinal tract.

2 Once in the intestines, the nutrient—and only the nutrient—is absorbed through the intestinal walls, while the gamma cyclodextrin is broken down by amylase.

3 This delivery system may increase the absorption of certain nutrients. In fact, in the case of CoQ10, it improves absorption by 8 times compared to standard forms, and has the potential to enhance the effectiveness of many other hard-to-absorb nutrients, too.‡

†GammaSorb has been shown to increase the absorption of certain hard to absorb (fat soluble) dietary ingredients.

CoQ10 has  
**8X higher**  
absorption with  
GammaSorb<sup>®</sup><sup>^</sup>

### Berberine Ultra Absorption

Berberine has been recommended in traditional practice and modern science to support healthy blood sugar, cholesterol and triglyceride levels, and overall metabolic health.<sup>\*\*</sup> However, it's estimated that only about 5% of

standard berberine actually makes it into the bloodstream. With GammaSorb, you get great berberine absorption at a lower dose.<sup>‡</sup>

- Healthy cholesterol & triglyceride balance<sup>†</sup>
- Optimal liver function
- Healthy blood sugar levels<sup>†</sup>
- Cognitive health
- Cellular function
- Joint health<sup>\*</sup>

### CoQ10 Chewable

As an example of GammaSorb's incredible absorption benefits, Chewable CoQ10 with GammaSorb has up to 8x better absorption compared to standard CoQ10.

Clinical studies show that CoQ10 provides powerful support for heart and brain health, plus healthy aging.<sup>\*</sup>

- Supports energy production in the cells<sup>\*</sup>
- Replenishes CoQ10 depleted by cholesterol-lowering statin drugs<sup>\*</sup>
- Helps preserve neural connections, healthy brain function, and overall cognitive health<sup>\*</sup>
- Reduces the risk of oxidative stress<sup>\*</sup>

### Quercetin plus Vitamin C

Quercetin is another valuable nutrient that is difficult to absorb. Some companies have tried to side-step these difficulties by using precursors or metabolites instead of quercetin itself. This formula combines the strength of quercetin and vitamin C for incredible immune support.<sup>\*</sup>

- Strong immune support
- Sinus, lung, & respiratory support
- Healthy histamine levels<sup>\*†</sup>

### Red Ginseng Energy Chewable

Delivers 7 times more rare, noble ginsenosides in a whole root red ginseng for full spectrum benefits.<sup>††</sup> Rare noble ginsenosides are 17 times better absorbed than standard ginsenosides.

- Mental & physical energy
- Stamina & endurance
- Resistance to stress<sup>^^</sup>
- Healthy cortisol, serotonin, & GABA levels<sup>\*†</sup>

<sup>‡</sup>GammaSorb has been shown to increase the absorption of certain hard to absorb (fat soluble) dietary ingredients. <sup>†</sup>Supports healthy levels already within normal range. <sup>††</sup>Compared to the rare, noble ginsenoside content of conventional ginseng. <sup>^</sup>Compared to standard CoQ10. <sup>^^</sup>Occasional stress. <sup>\*</sup>These statements have not been evaluated by the Food and Drug Administration. These products are not intended to diagnose, treat, cure, or prevent any disease.

# GAMMASORB® DELIVERY SYSTEM

**Unique Delivery  
System From  
EuroMedica®**

**Enhanced  
Absorption of  
Certain Fat Soluble  
Nutrients†**

**Delivers Benefits  
That Support  
Overall Health\***
