SUCONTRAL[®] D

Sucontral D with clinically studied *Hintonia latiflora*
Proven blood sugar support throughout the day**†

Driven by Science. Focused on Nature. Rich in History.

*THESE STATEMENTS HAVE NOT BEEN EVALUATED BY THE FOOD AND DRUG ADMINISTRATION. THIS PRODUCT IS NOT INTENDED TO DIAGNOSE, TREAT, CURE OR PREVENT ANY DISEASE.
† Supports healthy levels already within normal range.

What is Hintonia?

Traditionally, the dried bark of *Hintonia latiflora* from Mexico and South America has been used to support healthy blood sugar balance[†], and in fact, it is commonly found in marketplaces in Mexico.* It grows mostly in the desert and withstands an intense climate. Enduring monsoon-like rainy seasons and scorching dry spells has created a powerful defense mechanism within the plant itself. Much in the way that anthocyanins, protective compounds in berries, can be even more powerful after environmental stresses to the plant, the beneficial compounds of Hintonia are made all the stronger for its ability to survive and thrive in a difficult environment.

Why does Hintonia work?

Plants and plant extracts are complex, and the reasons behind their benefits can be a challenge to unlock. However, scientists have been working diligently to discover the keys to *Hintonia latiflora*'s success. Hintonia modulates alpha-glucosidase activity, an enzyme that converts carbohydrates into sugar. And coutareagenin, a polyphenol found in the bark extract, provides additional healthy blood sugar support via support of healthy insulin function.*†

60 Years of Clinical Research

Sucontral® D contains a clinically tested extract of a unique plant, *Hintonia latiflora*, a tree with white, trumpet-shaped, fragrant flowers native to Mexico and Central America. Hintonia has a long history of traditional use in Mexico, where it is sold in many marketplaces. The plant is found in the desert and withstands an intense climate, which helps concentrate its beneficial compounds associated with blood sugar support.*†

While the plant's benefits had been documented in Mexico and Central America for over 100 years, scientists in Europe were intrigued as to *why* it worked. In the past 60 years, leading German researchers have examined this botanical in laboratory studies and its effects in clinical trials.

Ultimately, they confirmed that one of the primary compounds in Hintonia was coutareagenin, a polyphenol found in its bark. However, while that component is important, scientists affirm that the whole extract is key, and each of its complex constituents is necessary for the best results. It simply can't be duplicated outside of nature.

More recently, scientists have combined synergistic vitamins and trace minerals with Hintonia for even greater benefits. It is that combination that created **Sucontral D**—a pairing of time-honored wisdom and leading-edge science.

[†] Supports healthy levels already within normal range

Clinically Studied—Impressive Results!

In a clinical study, adult participants were provided with **Sucontral® D**—a botanical extract of *Hintonia latiflora* combined with nutrients (vitamins B1, B2, B6, B12, folic acid, biotin, chromium, zinc, and vitamins C and E)—for eight months. At the end of the study, in every crucial measure, **Sucontral D** significantly and dramatically supported:

- Healthy Blood Sugar Balance**†
- Healthy A1C Levels*†
- Healthy Cholesterol Levels*†
- Healthy Triglyceride Levels*†
- Carbohydrate Metabolism*
- Healthy Insulin Function*

Quality of Life Improvement

Clinical research showed that with continued use, **Sucontral® D** improved overall quality of life associated with blood sugar balance.*†

Safe and Effective!

Best of all, the herbal intervention was well tolerated. *Hintonia latiflora* is an incredibly safe herbal medicine. Researchers followed up with study participants for almost three years, and there were **NO** significant side effects or problems reported.

Frequently Asked Questions

Q. What are “A1C levels”?

- A. A1C tests, also known as “HbA1c” or Hemoglobin A1C tests, indicate average blood sugar levels over time. The levels indicate what percentage of hemoglobin, the protein that carries oxygen in red blood cells, is “glycated” or “coated” with sugar.

Q. How were the levels of the vitamins/minerals in this formula determined?

- A. **Sucontral® D** was developed in Europe with the major focus on how best to deliver the unique polyphenols from *Hintonia latiflora* as the key ingredient for supporting blood sugar health.*† The great majority of benefits from this product are related to the activity of the *Hintonia*. However, the developers decided to include small amounts of other nutrients as a baseline of vitamin and mineral support. The clinical studies on this specific formula included the vitamin and mineral component, and so we have kept the formula exactly as it was used in human studies that showed beneficial results.

Q: What to pair with **Sucontral® D**:

- A: **Nerve Complex™** – Supports nerve function in the feet, legs, fingers, and throughout the body.*
- A: **Berberine** – Supports overall metabolic health, including healthy blood sugar, cholesterol and triglyceride levels.*†

† Supports healthy levels already within normal range

Sucontral® D—Proven Blood Sugar Support*†

Revolutionary German formula—now available in the United States exclusively through EuroMedica®

Proven safe and effective

Over 60 years of research

Improvements in overall quality of life demonstrated in a clinical study*

CLINICALLY PROVEN TO SUPPORT:

- ✓ Healthy Blood Sugar Balance*†
- ✓ Healthy Triglyceride Levels*†
- ✓ Healthy A1C Levels*†
- ✓ Carbohydrate Metabolism*
- ✓ Healthy Cholesterol Levels*†
- ✓ Healthy Insulin Function*
