

BosPro™

Advanced Boswellia • Healthy Inflammation Response*†

Boswellia, also known as frankincense, has been a vital component of Ayurvedic medicine for thousands of years. Modern research has confirmed the effectiveness of boswellia for supporting a healthy inflammation response.*†

- Provides cellular support*
- Up to 10 times more AKBA than unstandardized boswellia—no spiking to increase this beneficial compound
- Standardized to reduce undesirable beta-boswellic acid (BBA) content

Recommendations: 1 softgel daily, or as recommended by your healthcare practitioner. If pregnant or nursing, consult a healthcare practitioner before use.

†Occasional inflammation due to exercise or overuse.

BosPro™

Advanced Boswellia
Healthy Inflammation Response*†

CLINICALLY STUDIED
BOSWELLIA

60 Softgels

NON-GMO DIETARY SUPPLEMENT

SUPPLEMENT FACTS

Serving Size: 1 Softgel
Servings Per Container: 60

Amount Per 1 Softgel:	%DV
Calories	5
Total Fat	0.5 g < 1%†
Boswellia	500 mg **

(Boswellia serrata) Gum Resin Extract (BOS-10®) standardized to contain ≥ 70% total organic and boswellic acids with AKBA ≥ 10%, with ≤ 5% beta-boswellic acids

** Daily Value (DV) not established.
† Percent Daily Values (DV) are based on a 2,000 calorie diet.

Other Ingredients: extra virgin olive oil, gelatin, glycerin, purified water, beeswax, annatto in sunflower oil (softgel color).

Manufactured by a cGMP compliant facility exclusively for:
EuroMedica 955 Challenger Drive Green Bay, WI 54311
866-842-7256 euromedicausa.com

No sugar, salt, yeast, wheat, gluten, corn, soy, dairy products, artificial coloring, artificial flavoring, or artificial preservatives.

Features clinically studied, uniquely standardized (BOS-10®) boswellia

Extra strength for advanced support; up to 10 times more AKBA than unstandardized boswellia

Standardized to reduce undesirable beta-boswellic acid (BBA) content

Contains boswellia with high levels of naturally occurring AKBA—no spiking or artificial manipulation to increase this beneficial compound

Ideal for bronchial support—without drowsiness or jitters

Excellent for long-term lung support

Promotes cellular health*

Boswellia (*Boswellia serrata*) is well-known for its ability to support the respiratory system.* **BosPro** can help. It provides 500 mg of uniquely standardized boswellia, the clinically researched form used in studies around the world.

BosPro contains a high-AKBA (acetyl-11-keto-β-boswellic acid) form of boswellia. It's different from other boswellia extracts, which can have as little as 1% of this beneficial compound. It is also standardized to screen out beta-boswellic acid to less than 5%, as this compound can actually promote inflammation. It is a truly effective choice.

Featuring this strong boswellia extract means that **BosPro** provides much-needed support with no serious side effect concerns.*

Frequently Asked Questions for BosPro™

Q. What makes the boswellia in BosPro different from other boswellia supplements?

A. Boswellia has a number of beneficial compounds, AKBA (acetyl-11-keto-β-boswellic acid) being one of them. In fact, it supports pathways in the body that even other strong botanicals can't.* However, unstandardized boswellia can also contain beta-boswellic acid, which is not associated with optimal benefits. The boswellia in **BosPro** uses a unique process that ensures at least 10% AKBA, and virtually no pro-inflammatory beta-boswellic acid, so you get the benefits you need—and none of the compounds that you don't want.

Q. Where is the boswellia in BosPro obtained?

A. The boswellia used in **BosPro** is harvested from trees growing in northwest India. The trees are under the supervision of the Department of Forestry, which carefully controls harvest frequency and other issues of sustainability. Many of the sustainability concerns regarding boswellia are associated with a different species of boswellia, *Boswellia papyrifera*, which is a very fragrant species harvested for use in the perfume and incense industries.

Q. Is your boswellia sustainably sourced?

A. Yes. The boswellia we use is grown traditionally in India and harvested under the oversight of the Department of Forestry, which carefully controls harvest frequency and other issues of sustainability. The boswellia family contains over 20 species, and each species may be subjected to different sustainability concerns. We only use *Boswellia serrata* that is sustainably harvested and therefore does not contribute to the problems facing other species of boswellia.

What to Pair with BosPro™

Clinical OPC®

Features French grape seed extract VX1® and provides only low molecular weight OPCs for high absorption and optimal support of cellular health.*

CuraPro®

Delivers clinically studied curcumin combined with turmeric essential oil (featuring ar-turmerone) for enhanced absorption and blood retention to support a healthy inflammation response.*†

†Occasional inflammation due to exercise or overuse.
